Project summary

JOB MATCH 2020 addresses the problem of the loss of competitiveness of the cross-border area, improving the effectiveness of the labour market in Sicily and Malta and favouring the mobility of workers.

The area is in fact characterized by low internal demand, increased poverty and social inequalities, *brain drain* and weakening of the productive sector, youth and female unemployment, aging, non-collaborative companies in the R&I sector, inadequately trained human capital, low incidence of open innovation.

The project creates an Italo-Maltese cross-border cooperation centre for work that on the one hand provides counselling, tutoring, recruiting, human resources management for the two countries and on the other promotes memoranda of understanding to facilitate the cross-border mobility of workers with the involvement of public and private stakeholders.

Project results

An Italo-Maltese cross-border cooperation center for employment that will ensure at least 20 workers participating in the work experience during the start-up phase
